

# NC STATE UNIVERSITY

**Cool Season Perennial Grass:** Estimated revenue, operating cost, fixed cost, and net returns per acre in the establishment year (No-till).

Budget 86-1  
July-08

Description	Unit	Price	Quantity	Value	Your Farm
<b>Operating inputs</b>					
-Lime, applied	Ton	\$38.00	2.00	\$76.00	
-10-10-10, dry bulk	Cwt.	\$22.50	5.00	112.50	
-Fert. Spread, custom	Cwt.	\$1.75	5.00	8.75	
-Burndown Herbicide	Acre	\$6.50	1.00	6.50	
-Grass Seed	lb.	\$1.60	18.00	28.80	
-Other				0.00	
-Other:				0.00	
-Other:				0.00	
-Machinery Labor (From Table 2)				8.14	
-Other Labor	Hours	\$9.00	0.00	0.00	
-Machinery Fuel, Maint, Repairs (Table 2)	Acre			10.23	
-Annual Operating Capital <sup>a</sup>	\$	7.5%	62.73	4.70	
<b>Total Operating Costs</b>				<b>\$255.62</b>	
<b>Fixed Costs</b>					
			<b>Amount</b>	<b>Value</b>	
-Machinery Depr, Taxes, Insurance, & Interest (From Table 1)				\$11.17	
<b>Total Cost</b>				<b>\$266.79</b>	
<b>Production</b>					
	<b>Unit</b>	<b>Price</b>	<b>Quantity</b>	<b>Value</b>	
-Harvested as Pasture, Dry Matter	Ton	\$35.00	0.00	0.00	
<b>Total Receipts</b>				<b>\$0.00</b>	
<b>RETURNS ABOVE TOTAL OPERATING COST</b>				<b>-\$255.62</b>	
<b>RETURNS ABOVE ALL SPECIFIED COSTS<sup>b</sup></b>				<b>-\$266.79</b>	

<sup>a</sup> Interest on operating expenses for an average of 3 months.

<sup>b</sup> This is the net cost per acre in the establishment year, calculated as the Total Establishment Cost LESS the value of the pasture produced during the establishment year, if any.

## NOTES

Pasture typically is 65% digestible and provides 1300 pounds of TDN per ton of dry matter.

One half ton of pasture dry matter typically provides 43 animal unit days of grazing. A beef cow = 1 AU.

Budget does not include the cost of managing grazing livestock on pasture.

Budget prepared by:

J.T. Green, Jr., Crop Science Extension Specialist, NCSU (Retired).

G.A. Benson, Extension Economist, NCSU, Telephone: 919-515-5184

<b>TOTALS</b>										<b>\$10.23</b>		<b>\$8.14</b>	<b>\$18.37</b>

<sup>a</sup> Repairs and maintenance costs are calculated as a % of the initial cost in Table 1. Percentages are higher for equipment that is bought used.

<sup>b</sup> Repairs and maintenance costs per hour based on annual use shown in Table 1.

<sup>c</sup> Total fuel cost plus lube costs estimated as 15% of the fuel cost.

<sup>d</sup> Per acre costs for tractors and other self-propelled equipment includes an additional 10% allowance for travel time from farm to field.

<sup>e</sup> Labor cost per acre includes an additional 15% allowance for travel time, setting up and finishing up.

**Table 3. Sensitivity Analysis**

This table shows the annual charge to recover establishment cost under various assumptions about costs and stand life or planning horizon. Specifically, the cost shown in the enterprise budget on the first page are believed to be fairly representative of conditions in North Carolina. However, there is a wide variation in conditions from one farm to another and costs can vary from year to year. The table shows the effects of costs that are 10% higher or lower than the basic budget, singly and in combination with variations in stand life or planning horizon. Stand life is affected by many factors including persistence and farming plans may call for a stand to be replaced by another crop for reasons other than stand persistence. The annual prorated costs shown in the table do not include an interest charge on this investment.

ANNUAL ESTABLISHMENT COST PER ACRE

		STAND LIFE OR PLANNING HORIZON		
		5 Years	10 Years	20 Years
COST	-10%	-\$48.02	-\$24.01	-\$12.01
	Base	-\$53.36	<b>-\$26.68</b>	-\$13.34
	+ 10%	-\$58.69	-\$29.35	-\$14.67
