

**Switch Grass for Biomass for Energy Production:** Estimated revenue, operating cost, fixed cost, and net returns per acre in the **establishment** year.

Budget 87-11  
July-08

Description	Unit	Price	Quantity	Value	Your Farm
<b>Operating inputs</b>					
-Lime, applied	Ton	\$38.00	1.00	38.00	
-10-20-20, dry bulk	Cwt.	\$30.70	4.33	132.93	
-30% N Solution	Cwt.	\$19.75	1.33	26.27	
-Fert. Spread, custom	Cwt.	\$1.75	5.66	9.91	
-Switchgrass Seed <sup>a</sup>	lb.	\$15.00	6.00	90.00	
-Burndown Herbicide	Acre	\$6.50	1.00	6.50	
-Baling Twine	Ball	\$15.00	0.06	0.90	
-Other:					
-Other:					
-Other:					
-Machinery Labor (From Table 2)				16.05	
-Other Labor	Hours	\$9.00	0.00	0.00	
-Machinery Fuel, Maint, Repairs (Table 2)	Acre			20.63	
-Annual Operating Capital	\$	7.5%	142.16	10.66	
<b>Total Operating Costs</b>				<b>351.84</b>	
			<b>Amount</b>	<b>Value</b>	
<b>Fixed Costs</b>					
-Machinery Depr, Taxes, Insurance, & Interest (From Table 1)				<b>31.58</b>	
<b>Total Cost</b>				<b>383.42</b>	
	<b>Unit</b>	<b>Price<sup>c</sup></b>	<b>Quantity</b>	<b>Value</b>	
<b>Production</b>					
-Harvested as Pasture, Dry Matter	Ton	\$35.00	0.50	17.50	
-Harvested as Hay, Dry Matter	Ton	\$70.00	1.00	70.00	
<b>Total Receipts</b>				<b>87.50</b>	
<b>RETURNS ABOVE TOTAL OPERATING COST</b>				<b>-264.34</b>	
<b>RETURNS ABOVE ALL SPECIFIED COSTS<sup>c</sup></b>				<b>-295.92</b>	

<sup>a</sup> Seeding rate assumes pure, live seed.

<sup>b</sup> Interest on operating expenses for an average of 5 months.

<sup>c</sup> Use the sale price or market value of any hay produced. Use the estimated value of any pasture if used or the actual rent received if pasture is rented out.

<sup>d</sup> This is the net cost per acre for the establishment year, calculated as the Total Establishment Cost LESS the value of the hay or pasture produced during the establishment year.

## NOTES

Establishment year production may be harvested as hay and/or grazing.

Hay typically is fifty-five percent digestible and provides 1100 pounds of TDN per ton of dry matter.

To covert budget DM cost to hay cost as made, multiply by hay dry matter percentage as a decimal (E.g., 0.85).

Pasture typically is 65% digestible and provides 1300 pounds of TDN per ton of dry matter.

One half ton of pasture dry matter typically provides 43 animal unit days of grazing. A beef cow = 1 AU.

Budget prepared by:

J.T. Green, Jr., Crop Science Extension Specialist, NCSU (Retired).

G.A. Benson, Extension Economist, NCSU, Telephone: 919-515-5184

Switch Grass for Biomass for Energy Production: Estimated revenue, operating cost, fixed cost, and net returns per acre in the establishment year.

<sup>a</sup> Repairs and maintenance costs are calculated as a % of the initial cost in Table 1. Percentages are higher for equipment that is bought used.

<sup>b</sup> Repairs and maintenance costs per hour based on annual use shown in Table 1.

<sup>c</sup> Total fuel cost plus lube costs estimated as 15% of the fuel cost.

<sup>d</sup> Per acre costs for tractors and other self-propelled equipment includes an additional 10% allowance for travel time from farm to field.

<sup>e</sup> Labor cost per acre includes an additional 15% allowance for travel time, setting up and finishing up.

**Table 3. Sensitivity Analysis**

This table shows the annual charge to recover the full establishment cost under various assumptions about costs and stand life or planning horizon. Specifically, the cost shown in the enterprise budget on the first page are believed to be fairly representative of conditions in North Carolina. However, there is a wide variation in conditions from one farm to another and costs can vary from year to year. The table shows the effects of costs that are 10% higher or lower than the basic budget, singly and in combination with variations in stand life or planning horizon. Stand life is affected by many factors including persistence and farming plans may call for a stand to be replaced by another crop for reasons other than stand persistence. The annual prorated costs shown in the table do not include an interest charge on this investment.

ANNUAL ESTABLISHMENT COST PER ACRE

		STAND LIFE OR PLANNING HORIZON		
		15 Years	20 Years	25 Years
COST	-10%	\$17.76	\$13.32	\$10.65
	Base	\$19.73	\$14.80	\$11.84
	+ 10%	\$21.70	\$16.28	\$13.02
